

EVERY OTHER CELL PATTERN

Follow this pattern to achieve 8 inches (20cm) between plants if seeding into 4-inch spaced paper pots (LP303-10) or 12 inches (30cm) between plants if seeding into 6-inch spaced paper pots (LP303-15).

PAPER CHAIN PATTERN

The paper pot chain runs through the flat in a zig zag pattern. The following diagram shows each successive row of pots if you are wanting to seed different varieties in the same flat. This pattern keeps repeating from left to right. There are 6 cells in each “row” running the width of the flat and 44 rows.

BLUE = First row

Yellow = Second row

Green = Third row

ETC...
